Whatever you designed.....

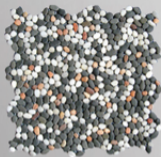

The Free Stone Group was established in 1999 and is based in Shanghai, China. Since its inception, the Group has been at the forefront in the development of new products and applications for decorative pebbles in China and over the past 4 years have developed export markets in a number of other countries.

◆-----PRODUCT PROFILE-----◆

FREE STONE

Free Stones originate from Taiwan and are created from natural pebbles which are collected from island beaches. This results in a sustainable product, which is environmentally sound and recyclable. Other characteristics include a high degree of slip resistance and durability and require minimal maintenance. Uniformity of colour, size and thickness is ensured through a hand sorting process, which ensures consistently high quality. The stones are individually placed together and bonded onto a mesh backing to form a sheet of mosaic tile.

Free Stone pebble tiles are a popular decorative finish in both Taiwan and China due to their desirable attributes of durability, texture, range of color and wide ranging applications. They can be used indoors and outdoors on driveways, patios, steps, pathways, swimming pools, showers, kitchen, flooring, fireplaces and countless other residential and commercial applications.
